# The S2 Nucleus Micro System

Welcome to the world of Nucleus Micro, the world's most well-rounded loudspeaker system.

Here in the 21st Century, there are numerous loudspeakers capable of producing fine sound; unfortunately, most of these are too large, unattractive or power hungry to work in modern environments. That's what makes Nucleus Micros different: a 4" diameter sphere available in your choice of decorator colors, Micros bring big sound into the smallest spaces. Designer Anthony Gallo has used a combination of patented technologies and proven physics to create a loudspeaker that flatters any décor, installs anywhere and performs magnificently with a wide range of A/V components.

Stereo, Home Theater or whole-house audio—with Nucleus Micro, the choice is yours! With two subwoofers (passive M1 or powered MPS-150) three installation options (shelf-mount, wall-mount or our architectural Wallflower™ stands) it's easy to match a Gallo system to your home and aspirations.

## Nucleus Micro

Because Smaller Is Better

Imagine a true high end loudspeaker that fits in the palm of your hand. A speaker that installs in seconds and comes in a palette of splendid colors to complement any room.

Most of all, imagine a speaker that produces beautiful music, even when driven by the most modest of associated components.

By choosing a sphere—the strongest shape known to man—Anthony Gallo eliminated internal resonance and external diffraction—the two main causes of speaker distortion. Our patented S2 technology enhances low frequencies that go way beyond conventional satellite speakers. By using our 3" full-range driver and by eliminating the crossover, the Nucleus Micro is endowed with spatial characteristics unsurpassed by any other loudspeaker, regardless of size or price. The result is a vast soundstage and pinpoint imaging which audiophiles crave, in a tiny, beautiful package that interior decorators demand.

"Gallo blew me away with their Micros...  
The sound from these speakers was  
amazingly big and dynamic offering  
some of the most realistic reproduction  
I've heard at a show."

Robert Reina - Stereophile

BLACK

"A speaker so utterly disarming to the eye and ear that people would sit before it, listen to music and never guess that the *Micros* were the source of the sound."

Neil Gader - *The Perfect Vision*

WHITE

"Looking good is one thing, but do they deliver the sonic goods? In two words 'You bet!'"

Steven Rochlin - [Enjoythemusic.com](http://Enjoythemusic.com)

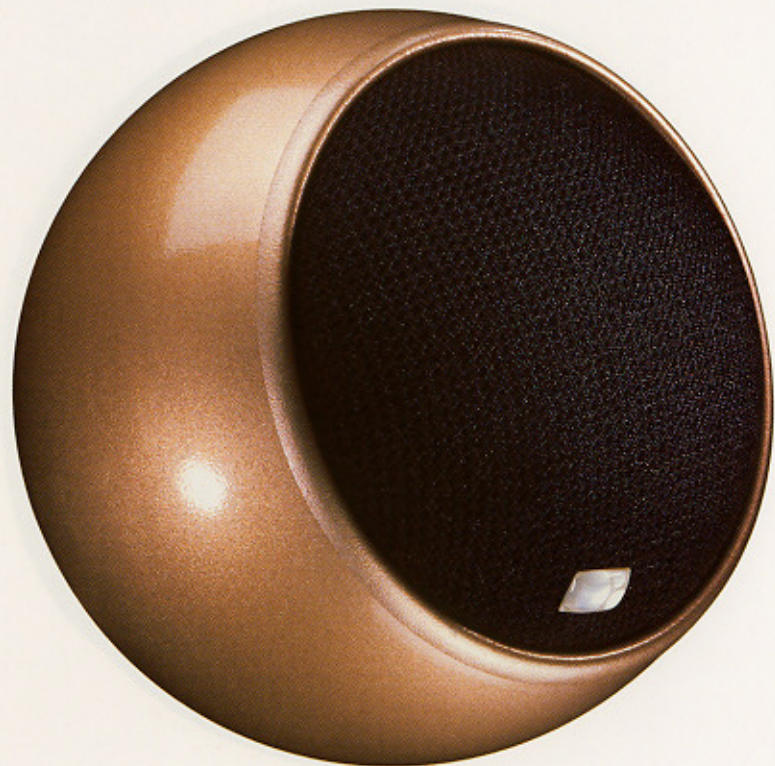

STAINLESS

"The perfect apartment speaker - an ideal balance of style and substance - extremely good at the price. The Micro is the best looking and sounding speaker system of its type that I've auditioned."

Doug Schneider - Soundstage.com

WINE

"The Micro is the best sat/sub system I've auditioned to date. The fact that it performs beautifully, looks awesome and is highly affordable makes it my discovery of the year."

Wayne Garcia - [e-town.com](http://e-town.com)

CHAMPAGNE

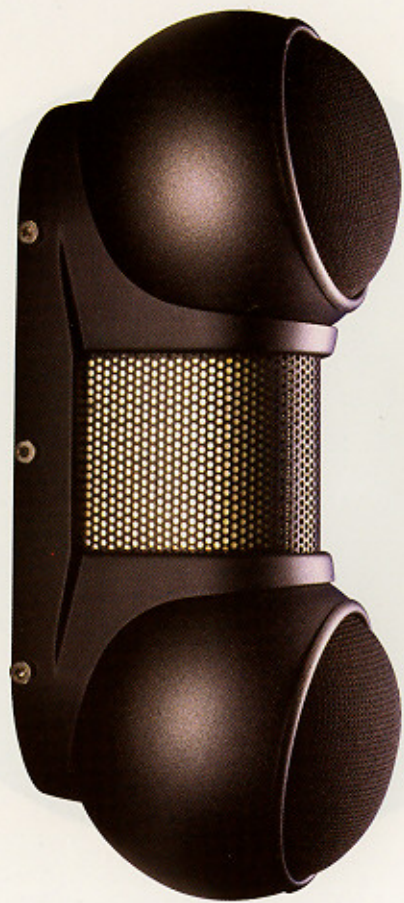

'Stereo imaging was impressive. We'll recorded soloists projected far into the room with a strong impression of depth around and behind them.'

Daniel Kumin - Sound and Vision

BRONZE

## Sound with Style? Bravo, Anthony Gallo!

Imagine. A speaker so versatile, it delivers uncompromising sound quality in every installation. A speaker whose unique tweeter produces more output than two dozen 1" domes, yet weighs less than one. A speaker so small and attractive, it flatters any décor.

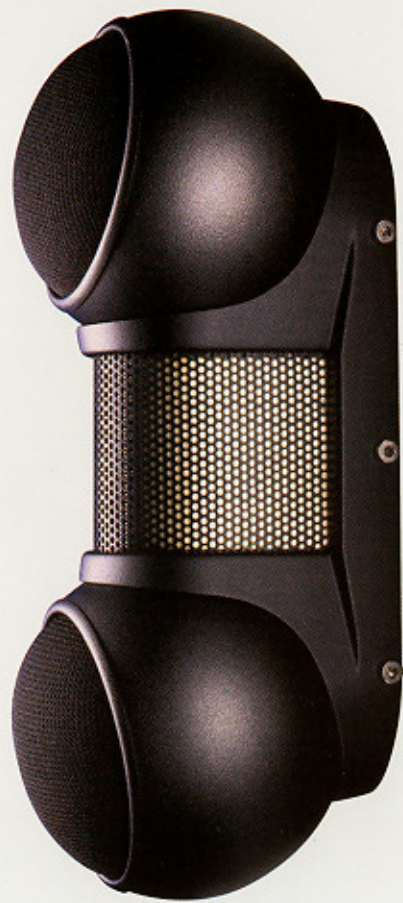

Introducing Dué by Anthony Gallo Acoustics, the first wall-mountable audiophile loudspeaker. Until now, music and movie lovers have been forced to choose between the mediocre sound quality of in-wall speakers and the visual imposition of "box-type" models.

DUÉ

With the debut of Dué, such compromise becomes a thing of the past. Measuring only 5" wide by 11" tall, Dué achieves state-of-the-art sound quality in a matchless array of applications. Most importantly, our use of cutting-edge technologies enables Dué to deliver a quality and quantity of sound that other speakers of this size and price have difficulty approaching.

Custom installation is a breeze, thanks to an ingenious bracket that enables Dué to work anywhere. Whether hidden on a shelf, supported by dedicated floor stands, flush-mounted to a wall and oriented either horizontally or vertically, Dué excels where other speakers fail. Available in black or

DUÉ

white powder-coated finishes, Dué adds a high-tech touch to media rooms.

Technically as well as aesthetically, Dué is in a class by itself. Building upon the resonance and diffraction-free enclosures developed for our acclaimed Micro satellites, President and Chief designer Anthony Gallo has elevated his patented S2™ technology to an even higher level of performance. The result is full range sound with perfectly coherent phase response and wave launch.

Using a next-generation version of our patented CDT™ tweeter – widely regarded as the world's finest high frequency transducer – Dué provides an ideal 120-degree dispersion pattern from 60Hz > 20kHz, and a

DUÉ

remarkable system sensitivity in excess of 93 dB! As a result, Dué easily fills the largest rooms with effortlessly dynamic sound.

High-end audio has never been so user-friendly! Home theater or stereo, wall-mounted or freestanding, the essence of each performance is yours to savor. And rest assured, with Dué by Anthony Gallo Acoustics, any seat in your room is the best seat in the house. For discriminating connoisseurs who demand both visual and sonic perfection, Dué represents the pinnacle of loudspeaker design.

DUÉ

15lb. Custom-made, heavy-duty woofer.

Full set of controls on our 150 watt amp.

Amp module can run two sub modules.

## MPS 150 POWERED SUBWOOFER

"A gem, fast as quiksilver and dynamic as a vial of nitro - a small wonder." - Perfect Vision

Our unique design allows you to remove the amplifier module and place it with the rest of your equipment. Only a single wire needs to go from amp to sub, no need to plug in the sub! You can hide our 6.75" tall sub module almost anywhere. At last, a sub that actually **can** fit under furniture!

If you need even *more* output you can run two sub modules off one amp, gaining many sonic advantages. It is easier and more cost effective than using most single, large subwoofers.

A system that looks great in your home *and* satisfies your need for high end sound

Since 1994, we have been handcrafting some of the finest loudspeakers in the world. Made in the USA, the Nucleus Micro maintains that heritage. Not only is the Micro *engineered* to sound good with almost any equipment you may purchase or already own, it is carefully *designed* to match your décor. We constantly monitor the leaders in interior, architectural, industrial and furniture design. This is the only way to insure that your speakers look right, feel right and blend harmoniously into your living space. Whether you have traditional or contemporary taste, we have a color and a texture that is right for you. From our hand polished stainless steel to basic black, we are confident the Micro will make you happy.

"The Micro produced a far bigger and better sound than either their diminutive dimensions or price tag would suggest." - Stereophile

## STEREO

For those music lovers who have neither the desire, space, nor budget to install a 5.1 channel home theater, may we suggest the Nucleus Micro stereo system? Partnered with even the smallest receiver or amplifier, our MPS subwoofer delivers delicate to powerful bass that lays a powerful foundation for musical enjoyment. A sophisticated crossover network routes the critical middle and high frequencies to a pair of our remarkable Micro satellites.

## WALLFLOWER STAND

Our elegant stands hide the wires from view. Stands come with an adapter which will allow you to install the Micro satellite in minutes.

## HOME THEATER

No doubt about it: if you've heard a good home theater, you want one! Unfortunately, finding space in your listening room for five speakers and a subwoofer poses some serious design challenges. In this respect, the Nucleus Micro Home Theater system simply has no equal. Given their tiny dimensions, placement flexibility and wide range of colors and textures, there's a Nucleus Micro satellite tailored to fit every décor. Add the bass wallop of our installation-friendly MPS-150 powered subwoofer, and every seat in your listening room becomes the best seat in the house!

## Accessories

### Isolation ring

All Micro satellites come with a rubber ring which is used for mounting on any flat surface.

### Wall Mount

Optional wall brackets are available in black and white.

## Specifications

	Micro Satellite	MPS Sub	DuÉ	Wallflower Stand
<i>All specs are per unit</i>				
Frequency Response	80Hz to 18Khz	24Hz to 160Hz	60Hz > 20Khz	
Sensitivity	89 dB/w		93db 2.8v (1M)	
Nominal Impedance	8 Ohms	4 Ohms	4 Ohms	
Power Handling	100 Watts	240 Watts Active	100 Watts	
Height on Wallflower Stand	36"			
Drivers	3" full range	10" long throw	2-3" full range	
Crossover	None	40Hz to 160Hz variable		
Tweeter			120 degree CDT	
Dimensions	4" Sphere	4 1/4"H x 10 1/4"W Amplifier Section	11"H x 4"W x 4 1/4"D Less outer grill	36" tall
Dimensions		6 1/4"H x 10 1/4"W Speaker Enclosure	11 1/2"H x 5"W x 4 1/2"D With outer grill	
Overall Dimensions		11 1/2"H x 10 1/4"W Overall Dimensions	From 12"H to 13 1/4"H On stand	
Variable Phase Control		0 to 180		
Selectable Auto On/Off		✓		
Weight	1.75 Lbs	38 Lbs	5.75 Lbs	8 Lbs
