Ever since 1975, when we realised that lifting a speaker also lifted the quality of the sound, Apollo hi-fi furniture has set the standard.

A new pitch in hi fi quality

The Apollo Mezzo Soprano range successfully combines the best of our technical expertise with exquisite good looks. And there is a range of ten great finishes to choose from. All engineered to give you maximum performance and flexibility.

The 44mm diameter spacers can be assembled easily to form a rigid shelving system, with a choice of 4 different heights between shelves: 93mm, 138mm, 183mm and 318mm. The shelves themselves are made from grey tinted, 6mm toughened safety glass* or 12mm clear glass, sandwiched between the spacers with black contoured isolation washers. You are also supplied with optional carpet piercing spikes.

NEW!
MEZZO SOPRANO
NOW AVAILABLE IN
800MM WIDTH!

Any number of shelves can be assembled up to a recommended maximum height of 1.5m, with your heavier components at the bottom. Mini and midi versions of the Mezzo Soprano are available. As is the new extended width of the Mezzo Soprano 800 and 1000.

You can hear the difference whenever hi-fi is placed on Apollo furniture. The sound is clear and unimpeded by vibration.

We've applied the same innovative thinking to all kinds of other hi-fi supports. And we're still developing and refining our designs today.

Leg width, glass thickness and shelf spacer depths are consistent throughout the Soprano range.

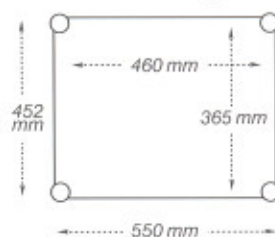

*6mm toughened glass is not available for the Mezzo Soprano 1000

Due to the limitations of the printing process, colour may differ from the printed photographs.
