

APOLLO SPEAKER SUPPORT SYSTEMS

Raising
hi-fi quality
to new
heights

We give your
speakers
our full support.

It is our firm belief that speaker supports should be seen and not heard. It's why we use heavy gauge steel supports and steel bases to increase rigidity and stability. It's why, as standard, you'll get sound - absorbing pads to isolate your speakers from the stand and adjustable spikes to isolate your stand from the floor.

Our range of low, medium and high mass speaker stands are of the very highest quality. Most can be sand or shot filled to vary mass loading.

Why?

Because at Apollo, we know that no two speaker types are alike.

It's why we make so many stands. Take a look at our range. You won't find a better choice anywhere else.

THE AZ

A fully welded, single square steel pillar design. Supplied filled with silicone sand, or can be shot-filled. Provides stylish, high mass speaker support. Supplied with 8mm floor spikes and rubber isolation pads.

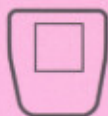

THE OLYM

A very stable, single pillar design. Medium mass unfilled, high mass when sand or shot filled. Top plate can be rotated 90° to support different speaker shapes. Supplied flat-packed with 8mm floor spikes and rubber isolation pads.

'What Hi-Fi' ★★★★★ Award. 'Hi-Fi Choice' Recommended.

RANGE

Height:

SR100 - 610mm.
SR150 - 860mm.

Top plate:
150mm x 125mm.
rotatable 90°

Setting the standard since 1975.

6mm Top plate spike kits and kiln-dried silicone sand kits can be supplied as optional extras for all but the SR range and the A19 stand.

All Apollo Speaker supports are available in Silver or Crackle Black.

Special colours available on request.

The company reserves the right to alter specifications without prior notice.

In 1975 we designed our first speaker stand because we understood that by lifting a speaker you lifted the quality of the sound.

We didn't stand still however.

We're constantly developing and refining our designs to provide some of the finest speaker, hi-fi and audio-visual supports available anywhere in the world.

Take a close look at our construction and you'll see that it's extremely sturdy. We use only top quality steel for our supports. Our spikes and pads fit securely, with no unwanted movement.

It's why Apollo products are now selling successfully worldwide. If you can't find them at your local hi-fi dealers, contact us at the address below and we'll send you details.
