

J.C. Verdier

Constantly imitated but never equalled, the Platine Verdier has been in production for more than 20 years and is sold all over the world. Its 18kg platter is supported by a magnetic repulsion system and a 20mm diameter bearing shaft. The quiet motor drives the platter with a belt or linen, and is placed at a distant to avoid the transfer of vibrations. The table comes with two armrest (one predrilled for SME).
