

Introducing the Gingko Audio ClaraVu™ 88 Monitor Speakers Hand crafted in the USA from the finest parts in the world!

Gingko Audio is proud to introduce the new ClaraVu 88 Monitor Speaker System.

Gingko Audio

These attractive speakers are the result of 4 years of research and development. Each speaker is hand crafted in the USA using the finest parts in the world: custom drivers, high-quality caps and coils, OCC copper cabling, and unique cabinet construction, resulting in superlative resolution and musicality.

The system's small size is perfect for apartment-size high-end systems, yet its big sound offers satisfying performance in reference-level setups. A combination of 89 dB sensitivity and 8 ohm minimum impedance means the ClaraVus are easily matched with a wide range of tube or solid state amplifiers.

They are available in three beautiful finishes: maple, cherry, and gloss piano black. There are also three choices of finish for the speaker baffle: brushed aluminum silver, dark brown textured wenge, and matte black. Simulated leather baffle finish is also available as a special order. So effectively, the user has 12 options/combinations of finishes to fit any décor. A matching piano black stand completes the ensemble.

The ClaraVu speakers will show you a "clear view" into your music by capturing all the details and nuances of the recording and performance.
