

The First "**ALL-IN-ONE Cable**"--Harmonic Technology is proud to introduce the first all-in-one **Photon AmpliCable**, manufactured by INEX Corp. Combining the capabilities of an interconnect cable, amplification system and speaker cable, the Photon AmpliCable allows you to connect your source, or your preamp, directly to the speakers for outstanding sonic reproduction.

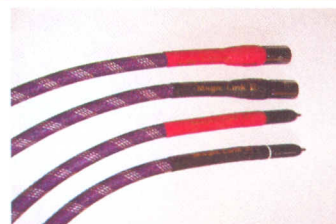

A unique preamplifier manufactured by INEX with the state-of-art fiber optical technologies is also available. This preamp has set a new standard in musical harmonics. The INEX Photon Preamp helps you explore the true sounds of your system's full potential.

Pro-9 Reference External Bi-Wire provides a unique design, two separate sets—the Woofer set and the Tweeter set **MERGED** at the amplifier end. Pro-9 Internal biwire and Mono wires are also available.

Harmonic Technology's **MAGIC LINK Two** is the newly improved interconnects cable to help you fully recreate the "*magic*" of recorded event in your home environment.

ProSilway MK III Plus is another newly improved interconnects cable from Harmonic Technology.
