

### Jasmine EL34-PP Integrated Tube Amplifier -- "Piano"

Jasmine 'Piano' delivers to the audiophile a warm listening atmosphere. In fact, a non-enthusiast will likely convert once accustomed to this sound. The attractive design is influenced by a form-follows-function platform. This amp is much more visually pleasing in your living environment than a cold, ugly and mass-produced box. And that is while it is not even playing.

Hit the power switch, and the warm glow of the vacuum tubes come to life. Sit back and relax as J.S. Bach, Miles Davis or Jim Morrison are resurrected in your living room, and haunt your home with spine-tingling performances. A well-designed tube amp can bring old recordings to life and tame the harshness associated with some digital media. With this wonderful tube amp, you'll be immersed into the music and not the limitations of your equipment.

**Output power:**  
43W x 2 @ 4 or 8 ohms

**Input Impedance:**  
100K ohm

**Tubes compliment:**  
2 x 6F2 and 4 x EL34

**Line level inputs:**  
3 sets of RCA  
(100k ohms)

**Freq. Response:**  
15Hz ~ 50KHz  
( +/-1.5dB )
